SUMMARY

B.Tech AI & ML student (CGPA: 9.37) with practical software development experience building and deploying full-stack applications using the MERN stack. Strong in secure backend architecture, REST APIs, authentication, real-time systems, and AI-integrated features, with experience owning applications end-to-end, including a live e-commerce platform built for a real business. Strong foundation in DSA, DBMS and Operating Systems, with a focus on software development. Seeking Software Development Engineer (SDE) internship opportunities.

EDUCATION

Birla Institute of Technology, Mesra

2024 – 2028 (Expected)

B.Tech in Artificial Intelligence & Machine Learning | CGPA: 9.37 (through 4th semester)

Champions Science Junior College, Andheri, Mumbai

2022 - 2024

Higher Secondary (12th Grade) | Percentage : 88%

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript, Python
- **Frontend:** HTML, CSS, Tailwind CSS, React.js, Next.js, TypeScript
- **Backend:** Node.js, Express.js, REST APIs, JWT
- **Database:** MongoDB, MySQL
- **AI Integration:** LLM APIs, Vector Embeddings, Semantic Search, RAG, LangChain, LangGraph
- **Real-Time:** Socket.IO, WebRTC, LiveKit, Yjs CRDT
- **Tools:** Git, GitHub, Postman
- **Core Expertise:** DSA, DBMS, Operating Systems, OOPS

EXPERIENCE

Full Stack Intern | Techconsonance

June – July 2026

- Architected a **JWT authentication system** from scratch — access tokens, refresh tokens, bcrypt hashing, and **2-tier role-based access** — securing **10 backend endpoints**; added server-side **Zod validation on 4 endpoints**.
- Engineered a **6-screen connected user flow** for an internal tool, wiring up **12 REST endpoints via Axios**.
- Replaced scattered try/catch error handling with a single centralized middleware used across every route, and resolved a slow User-collection lookup by adding a database index.
- Integrated an **Email service** for signup verification and **Cloudinary** for profile image uploads.

Member, IET Student Chapter, BIT Mesra

PROJECTS

AlignX — Team Collaboration Platform

[Live Demo](#) | [GitHub](#)

Tech Stack: Node.js, Express.js, React.js, MongoDB, Socket.io, WebRTC, LiveKit, Yjs CRDT, LLM APIs, all-MiniLM-L6-v2 Embeddings, JWT, REST APIs, Tailwind CSS

- Designed and built a full-stack MERN collaboration platform with **66 REST APIs**, **9 MongoDB models**, and **50+ React components** integrating **secure 3-layer authentication system**, Discussions, Meetings, Collaborative Workspaces, deployed and tested with real users.
- Shipped **AI Discussion Summarization** using the **Groq LLM API**, sending only unread messages per request to keep calls scoped and low-cost.
- Implemented **Semantic Search** over chat messages using **all-MiniLM-L6-v2 embeddings**, stored and queried via **MongoDB Atlas Search**.
- Built 1:1 voice and video meetings using **WebRTC signaling** and integrated **LiveKit (SFU)** for group meetings, with screen sharing.
- Enabled **real-time collaborative document editing** using **Yjs CRDT** for **conflict-free sync**.

ChocoKari — Chocolate E-commerce Platform

[Live Demo](#) | [GitHub](#)

Tech Stack: Node.js, Express.js, React.js, MongoDB, Razorpay Integration, JWT, REST APIs, Tailwind CSS

- Built and deployed a production-ready MERN e-commerce platform for a real chocolate business, replacing manual WhatsApp/phone ordering with online ordering, **JWT authentication**, **Role Based Access**, an **admin dashboard** for efficient product and order management and **Razorpay payments**.
- Engineered a customizable chocolate-box configurator with dynamic pricing logic as well as bulk corporate ordering system.
- Developed a **score-based recommendation engine** using a 4-question customer quiz, along with cart, wishlist, order tracking features.

ACHIEVEMENTS

- **Problem Solving:** 450+ Data Structures & Algorithms / Competitive Programming problems solved.
- **LeetCode:** 270+ problems solved covering advanced topics such as Trees, Graphs, and Dynamic Programming.
- **Codeforces:** Achieved a peak rating of 1179 and solved 180+ problems.
